

Village School Integrated Preschool Program

Now accepting applications for 3- and 4-year-old regular education students for September 2012 enrollment in full-day preschool

The program offers an active, supportive environment in which preschool students with Special Needs and typical peers learn together through developmentally appropriate, curriculum based activities and experiences. The curriculum is based on the Common Core Preschool Standards, which include goals in the areas of Personal and Social Development, Cognitive Development and Creative Expression/Aesthetic Development. Students leave fully prepared for Kindergarten.

“My daughter is in the top reading group, has the best handwriting in her class, and knew all sight words upon arrival. Thanks to Village Preschool.”

Janet Gray, parent of a former student
