

4118.14 Chest-Feeding and Lactation Policy

ACES values the well-being of our employees and their families. We recognize that a normal and important role for parents is to have the option and ability to provide for their children by chest-feeding or expressing milk in the workplace. An employee may, at their discretion, express milk or chest feed on-site during their meal or break period. The amount of break time necessary shall be agreed upon between the employee and their supervisor. The Board directs the Superintendent or their designee to take measures and develop regulations to ensure that all ACES employees shall be provided with an adequate and private location for the expression of milk or chest feeding.
