# COGNITIVE COACHING<sup>SM</sup>

## FOUNDATION SEMINAR – SPRING 2024

Deepen coaching and leadership skills to create sustainable practice!

**Cognitive Coaching<sup>SM</sup>** is a research-based model that capitalizes on and enhances an educator's ability to be a reflective practitioner to improve practice and ultimately student performance.

This 8-day seminar will support any district, school, and teacher leader in the coaching and supervision of others, and aligns with the growth-model approach highlighted in the new educator evaluation plan.

**Come alone or, even better, bring a team to build a cohesive and consistent approach!**

### Join us to learn how to better:

- Create reflective practitioners who exhibit more accurate self-awareness and deep engagement in professional growth
- Identify instructional problems early and support educators before a support plan is needed
- Increase evaluator capacity and competency in providing high-quality feedback that grows sustainable practice
- Build trusting relationships needed for risk-taking
- Utilize three coaching conversation maps for planning, reflecting, and problem-resolving
- Ask thought-provoking mediative questions that open thinking
- Practice coaching interactions to differentiate for individual needs

## Spring 2024 Seminar Dates

3/6, 3/7, 4/3, 4/4, 5/1, 5/2, 5/22, & 5/23/2024
